

Sr. Health Policy Analyst: Provide analytical support and staffing of the Clinical Research Policy Analysis and Coordination (CRpac) staff, with the Office of Science Policy at NIH, on a range of topics related to the conduct and oversight of clinical research. The candidate will analyze ethical and policy issues in clinical research, prepare papers, review and assist in the development of guidance on human subjects oversight of clinical research, and analyze harmonization issues in federal agency regulations regarding human subjects research. In addition, participate and organize various NIH meetings.

Qualified candidates will have an MS/MA, Ph.D., or professional level degree in bioethics, clinical research, or a related field. To apply:
